

Rigger's tower climber kit - Matrix QC

WK11

A lightweight and comfortable kit enabling riggers to work at height safely

The riggers kit is versatile allowing for work positioning and fall arrest. It can be readily integrated into systems for rope access, rescue and evacuation.

The multi-functional MATRIX full body harness provides maximum support while still giving good freedom of movement. The shoulder strap configuration ensures good fit with maximum comfort and security. The sit harness configuration allows the user to work from a seated position if required.

Quick connect leg buckles for rapid fitting.

The integral delta screwlink simplifies attachment and use of chest ascenders.

The large ring allows easy attachment of descenders, lanyards and cow tails, reduces bulk at front of harness.

The side D-rings allow work positioning and fold away discreetly

The robust and ergonomic Tensor twin lanyards allow for continuous attachment while climbing.

Kit includes:

- MATRIX full body harness with side D's and Q/C legs
- ELITE twin lanyard 1.25cm
- PIRANHA adjuster for positioning or restraint 2m
- DUON helmet EN 12492
- Kit bag 30L 18kg WLL
